BREAKFAST_MENU

DAY_MENU

BREAKFAST_DAY_MENU

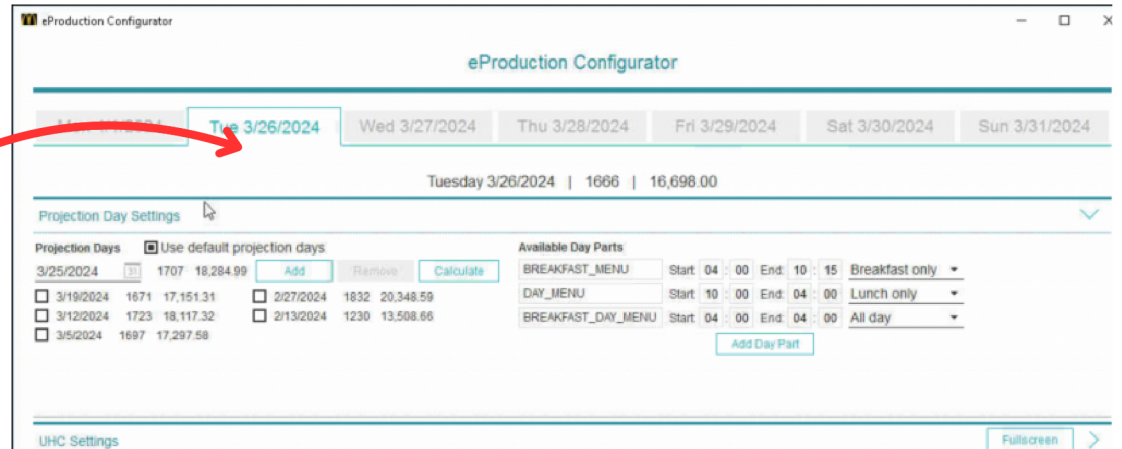

Transition

Use Tray Inserts

Double click the eProduction Configurator Tool on the office desktop

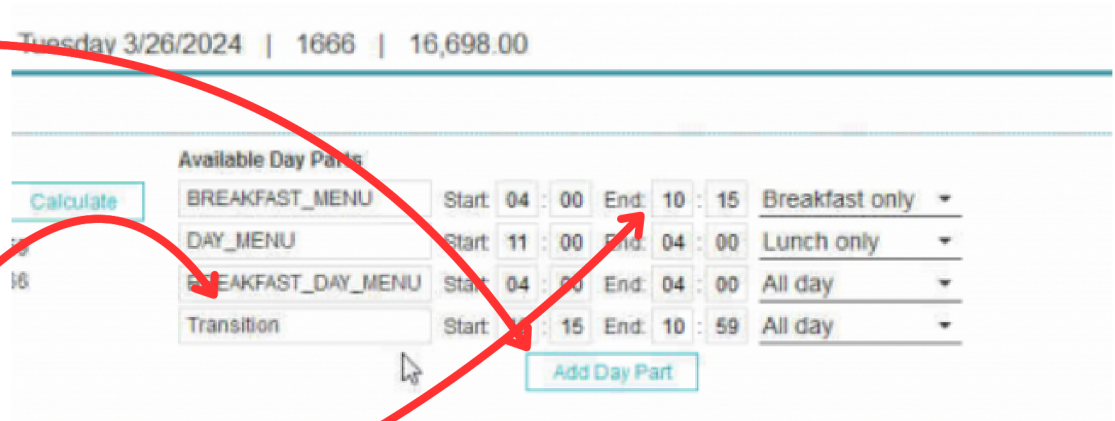

When the tool opens, it will land on the current date. In this example, we're on Tuesday.

On each day, click "Add Day Part"

Rename the Day Part "Transition" and set for 15 minutes before you start lunch, and set to end when breakfast ends.

Change the breakfast menu to end at 10:15, and change lunch to begin at 11am

NOTE: You must do this step for every day of the week. Changing Tuesday will only change Tuesday and not any other days.

UHC Settings

Intermediate Items

Unassigned Items

Production Mode: Fried Grill All

UHC Layout: Not active

5 10.1 6 Trays 4	15 CANADIAN 8 Trays 2	407 NUGGETS 48 Trays 4	1
11671 CRISPY 4 Trays 3	8 FISH 12 Trays 3	2813 BISCUITS 5 Trays 2	21
5358 HOTCAKES 12 Trays 2	1000 BEEF STEAK 4 Trays 2	16 Round EGGS 14 Trays 2	845

After adding a transition day part to each day, select the “UHC Settings” section.

Select “Intermediate Items.”

Edit Intermediate Product

3952	scrambled egg	Name:	scrambled egg
71	Sausage 2	contains	0.25000000 Units of
8498	folded eggs		
15	canadian bacon		
		1	REGULAR BUN
		2	Global Qtr Bun

Select “New” on the top left. Your screen may be blank or only contain scrambled eggs.

Maintain Intermediate Products

New Intermediate Product

Name: steak Description: steak transition

contains 0 Units of raw material

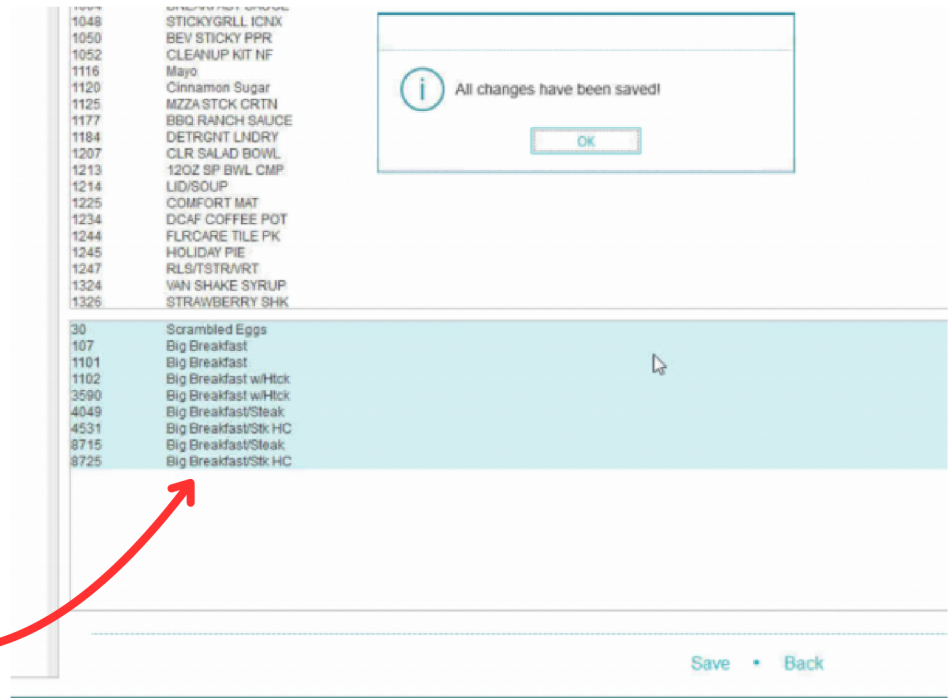

799	Pfite um liner
809	Scrub Brush red
820	HAND LOTION
821	21OZ SD/21HLDY
827	Newman's French
830	RSTRM CLR MCD
844	ICE BAG/CATERING
883	4oz Blubry Muff
885	BRUSHRSTMHLDR
883	BROOM INDOOR 18
921	CHOC PPMNT SYRP
931	Choc Crml Syrup
955	COFFEE CARE
958	BK PMPKN PIE
968	STEAK SEASONING
993	BKD BLUICRM PIE
1000	BEEF STEAK
1004	BREAKFAST SAUCE
1048	STICKYGRLL ICNX
1050	BEV STICKY PPR

Name the item and provide a description. Change “contains 0 units” to “1.”

Select the corresponding raw item from the list.

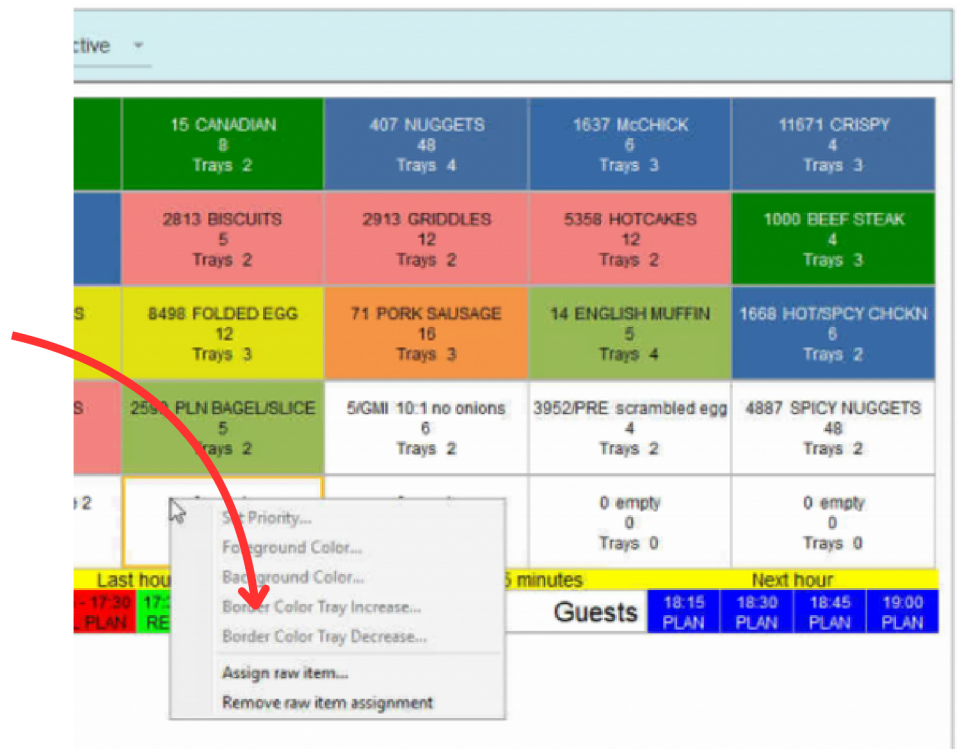

Select "Save" on the bottom of the screen. Then click okay in the box that pops up.

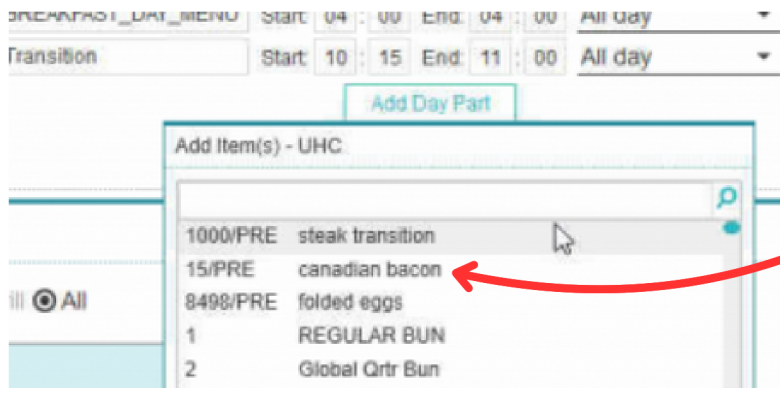

NOTE: The program automatically lists the menu items associated with the raw product.

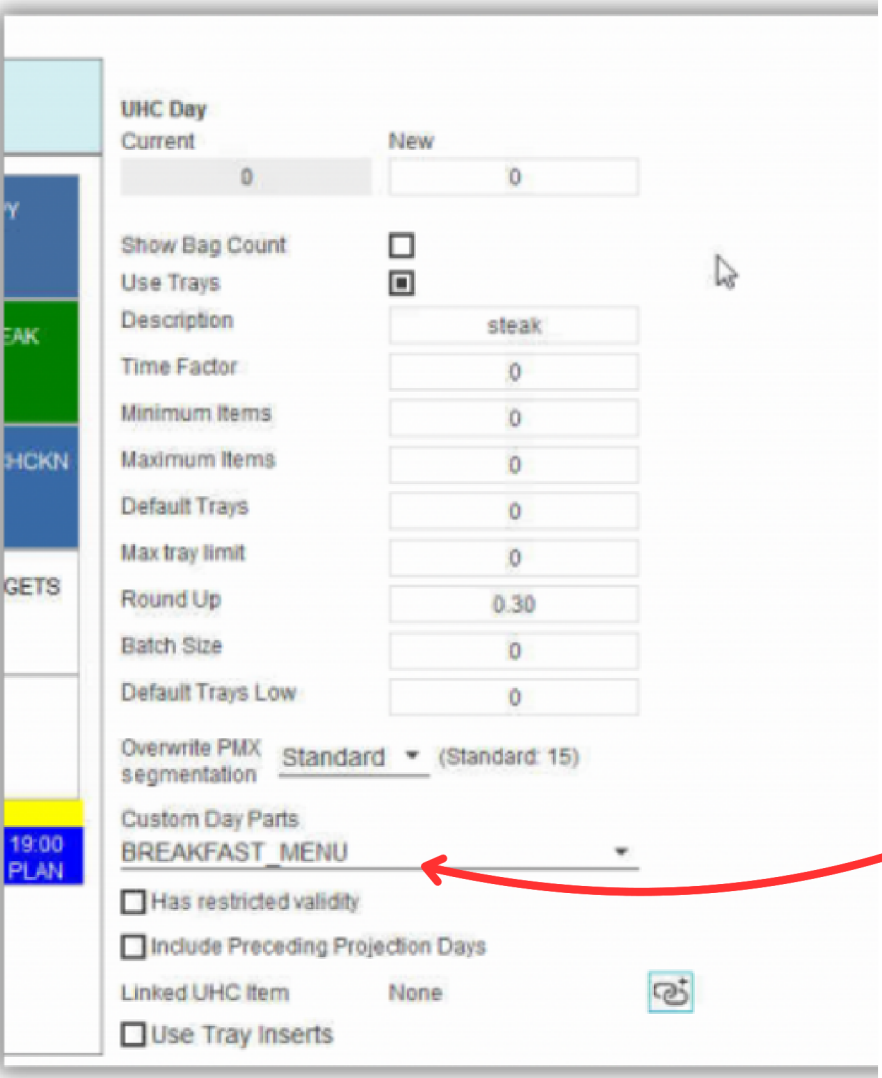

Back on the UHC Tab, right click anywhere in the layout to add a new product.

Select "assign new raw..."

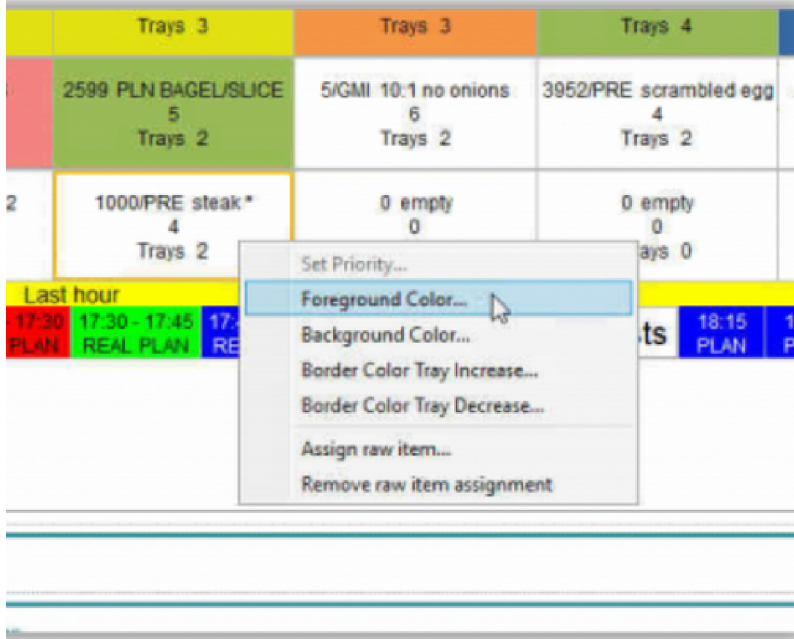

Select the Intermediate Item you created.

NOTE: The settings for intermediate items are set to default "0."

Change the settings according to the PQRG, but make sure you set the maximum trays to match your transition cabinet layout.

Make sure to select the new transition day part.

Right click the item again to change the screen colors.

NOTE: Border color for tray increase is white and for decrease is black.

Follow these steps for each raw breakfast item.

When finished, click "save on local system" to save the settings.

To send to the eProduction monitors immediately, click activate. The monitors will reboot.

Clicking save but not activate will send the changes through at next store open.
